APC Assignment 2

05/31/2022

❖ **Incremental Model:**

- Specification
  - Analyze the system to see that all constraints are met before deploying it
  - Checking to see if the scheduling system will be able to create a user and other simple, basic functions
  - Allow the user to test it
    - Grab feedback such as what is missing or what needs to be changed
- Development
  - Use the user feedback to make changes or to create a new version with the updated changes
  - Compare the old version with the new version to see if changes are significant/are met
- Validation/Testing
  - Release the updated version to certain user(s)
  - Grab feedback and responses
  - Debug for bugs and crashes
  - Release updated version to all user(s)
